## Mud bug time at the Marina

Now that our hosting duties for the boat show are done, it's time for the annual marina crawfish boil Saturday, April 22, from Noon 'till they're gone. It will be in the marina parking lot in front of the office, across from pier 14. Tickets are available that day and are \$25 each and \$5 for ages 12 and under. This includes all the crawfish you can eat, as well as beverages. Guests are welcome and no reservations are required. There will be entertainment as well.

This is the first big gathering of the year and always a lot of fun. Come see your marina friends you haven't seen for awhile and meet some new ones. This is a rain or shine event, which means it'll happen no matter what, so bring your appetite and let the good times roll.

### Reminders

As the Southwest International Boat Show hits the stage April 6-9, remember you will be affected.

The parking lot is already fenced off and closed as of Saturday, March 25 and will reopen Wednesday, April 12. Parking will be available for marina members in the underground parking, and the lot at the northwest end of the marina, between piers 1 and 4. Remember to hang your Tenant Parking Permit from the rear view mirror. Boat owners who will be required to move their boat should have received notification directly from the marina office as to when you will have to move and where and when you can return. Tenants will receive a discount at the gate with member ID.

Don't forget to take advantage of the fun in your own backyard with these opportunities:

- Onshore there will be live music and more than 200 vendors offering a variety of services and products for the boating and outdoor lifestyle.

and mud bugs, are freshwater crustaceans found on every continent except for Africa. In appearance they greatly resemble the lobster, but are much smaller. Crawfish range in size between 3 to 10 inches depending on the species and the location. They grow throughout a series of molts by which they shed their exoskeleton and produce a new one. A crawfish nearly doubles its size with each molt.

- Crawfish are both fished — from natural rivers, bayous, swamps and lakes — and farmed. The main farmed species in the U.S. is the Red Swamp
